

## How to Conduct an Emergence Survey and an Introduction to Sound Analysis

<b>Summary</b>	This course is for people who want to learn how to conduct an emergence survey and how to analyse calls.
<b>Level</b>	Beginners
<b>Who is it for?</b>	Those wishing to become consultants, students, graduates and interns
<b>Trainer</b>	Claire Andrews BSc (hons) MCIEEM
<b>Topics Covered</b>	Types of bat detector – advantages and disadvantages and use Survey preparation and planning Equipment required Guidelines and professional standards What to look for and record Basic bat ID Practical session at roost Introduction to sound analysis including an introduction to available software and basic principles
<b>Details</b>	The day will start late morning in the classroom where we go over the various topics and learn about sound analysis. There will be a break to get food and the evening session will commence at a known roost where you will hopefully see bats emerging*. We will help you set up your detector and recording equipment and you will have an opportunity to try out other types of detector.
<b>Cost</b>	£90 plus VAT
<b>Location and Timing</b>	Rotherwick (5 min from Junction 5 of M3) 30 <sup>th</sup> April 2018 First session 1200 – 1800 second session 2000 - 2200
<b>Booking</b>	E-mail <a href="mailto:claire@caecology.co.uk">claire@caecology.co.uk</a> or call 07933941470

\* If weather on the evening is not suitable we will visit the roost anyway and go through setting up the equipment – there is no guarantee of bats emerging.  
Participants will also have the opportunity to shadow on a professional survey on another date should they choose to.
